Executive summary

1. We are Prequalified Consultants with the Victorian, NSW, QLD, NT, SA and Tas Governments

Connley Walker is a prequalified consultant with the Victorian Government Construction Supplier Register in the areas of Building Condition Assessments, Communications, Electrical Engineering, Fire Protection and Project Management and as security consultants with the Department of Justice and Community Services. In NSW we are pre-qualified security consultants, in Queensland we have achieved consultant prequalification to undertake building work for the QLD Government, in SA we are prequalified as a professional service contractor – electronic engineer to Level 3 (the highest level), in Tas we are prequalified building services engineers (incl. security) and in NT we are prequalified security consultants.

2. Information Security Management

Connley Walker has an Information Security Management System that is certified to ISO 27001. This certification guarantees that we have a structured, comprehensive approach to managing information security risks. Connley Walker is the only Australian independent security consultancy to achieve this certification.

3. Quality Management

Connley Walker has a quality assurance management system that is certified to ISO 9001.

4. Environmental Management

Connley Walker has an environmental management system that is certified to ISO 14001.

5. Safety Management

Connley Walker has an Occupational Health and Safety System that is certified to ISO 45001.

6. We are fully independent.

Our independence ensures our integrity. As independent security and risk consultants we do not provide any insurance, guards, equipment, installation services or any other item that may be a conflict of interest.

7. We are genuine security and risk consulting specialists.

Unlike general IT, building services, engineering or communications consultancies, we are genuine security and risk specialists. Security is our core business, not an add on.

8. We contribute to security research.

Connley Walker partnered with the University of Canberra, Western Australian Department of the Attorney-General, Family Court of Australia, Courts Administration Authority, Magistrates Court of Victoria on a significant security related research project titled "Fortress or Sanctuary? – Enhancing Court Safety by Managing People, Places and Processes". By contributing to research Connley Walker have access to the latest thinking in security.

9. Our principal consultant represents Engineers Australia on security related Australian Standards.

This contribution to the development of security related Australian Standards ensures that we are always up to date with current best practice and can advise clients of impending changes to standards.

10. Our principal consultant is an SCEC Endorsed Security Zone Consultant.

Australian Government departments and agencies are encouraged to utilise the services of a Security Construction and Equipment Committee (SCEC) Endorsed Security Zone Consultant to establish appropriate physical security environments for the protection of official information and assets.

11. We have international coverage.

Connley Walker has carried out assignments for clients located in Canada, England, Ireland, New Zealand, Northern Ireland, Samoa, Saudi Arabia, Scotland, Solomon Islands and South Africa.

Capability and experience

Connley Walker Pty Ltd (est. 1996) is an independent professional engineering consultancy with SCEC Endorsed Security Zone Consultants specialising in security, technology and risk management. We have worked with a full range of industries to provide security solutions ranging from commercial applications to national defence.

Our approach is to translate modern risk management principles into cost-effective practical solutions for our clients. We achieve this by examining a client's management strategies and applying the available human, technology and physical resources to give a balanced result. Our emphasis is on finding the optimum level of risk management for a particular client. The optimum level is one that balances the cost of protection with the cost of losses to provide an overall minimum cost.

Connley Walker has extensive experience providing security consulting services to local government having worked with eighteen councils over numerous engagements. We regularly provide our local government clients with:

- Security reviews and risk assessments.
- Safety audits, including outdoor lighting reviews to ensure compliance with Australian Standards.
- Detailed design and acceptance testing / commissioning of security installations and upgrades including engineering design of CCTV, access control and security alarms within council buildings.
- Detailed design of public safety CCTV systems and development of CCTV governance framework.
- Development of security strategies, frameworks, policies and procedures.
- Business Continuity Planning.

Our experience in local government provides us with insight into the unique challenges and appropriate security treatments for various sites and facilities managed by council including office buildings, halls, sport facilities, libraries, retail and entertainment districts, etc.

Our expertise in the security industry is supported by our representation of key industry bodies; the owner of Connley Walker, and the consultant proposed for this project, Simon Walker, represents Engineers Australia on security related Australian Standards. This contribution to the development of security related Australian Standards ensures that we are always up to date with current best practice and can advise clients of impending changes to standards.

Furthermore, Connley Walker has strong connections with ASIAL and has been assigned the responsibility of conducting grading assessments and consultancy services for Monitoring Centres and Class 5 Alarm Manufacturers seeking ASIAL certification to the AS 2201 suite of standards.

We are a prequalified consultant throughout Australia. In Queensland we have achieved consultant prequalification to undertake building work for the QLD Government, in Victoria we are prequalified with the Construction Supplier Register in the areas of Building Condition Assessments, Communications, Electrical Engineering, Fire Protection and Project Management and as security consultants with the Department of Justice and Community Services. In NSW we are pre-qualified security consultants, in SA we are prequalified as a professional service contractor – electronic engineer to Level 3 (the highest level), in Tas we are prequalified building services engineers (incl. security) and in NT we are prequalified security consultants.

Connley Walker also maintains superior management systems ensuring that our clients consistently receive an exceptional service. Connley Walker holds third party certification for our Quality Assurance, Information Security, Work Health & Safety, and Environmental management systems.

Project experience

This section demonstrates our capability to provide security consultancy within a local government environment.

Wollongong City Council

Undertake, document and validate a complete audit of Council's CCTV infrastructure including an assessment of the true value of the system, life expectancy and any compliance issues

Development of CCTV Framework for Strategic Development including action plan and schedule for implementation, and sustainability recommendations

Port Macquarie Hastings Council

Review of security services at buildings throughout the municipality including site inspections of 70 council owned facilities.

Cairns Regional Council
